Luxembourg - March 20th, 2019 – The Board of Directors of d'Amico International Shipping S.A. (Borsa Italiana: DIS), a leading international marine transportation company operating in the product tankers market (the "Company" or "d'Amico International Shipping"), resolved today to approve the draft of the 2018 full year statutory and consolidated financial results.

MANAGEMENT COMMENTARY

Paolo d'Amico, Chairman and Chief Executive Officer of d'Amico International Shipping commented:

"2018 was unfortunately one of the worst years for product tankers in the last decade. However, DIS managed to mitigate the effects of such a negative market, thanks to a prudent commercial strategy coupled with a constant focus on strengthening its financial structure.

The market was relatively weak throughout the first nine months of 2018 and hit historically low rates in the third quarter and the first month of the fourth quarter. This led our Company to post a net loss of US\$ (55.1) million in the full-year 2018. However, we were very pleased to see our market rebounding to profitable levels towards the end of the year, with clear signs of improvement confirmed also at the start of 2019, relative to the prior year.

DIS' daily spot average was of US\$ 10,798 in 2018 vs. US\$ 12,026 achieved in the previous year. At the same time, we could count on 34.2% time-charter coverage during the year at an average daily rate of US\$ 14,850. Our total blended daily TCE (spot and time-charter) was of US\$ 12,184, which is a rather satisfactory level, given the weak freight markets confronted, proving once again that our prudent strategy of covering part of our fleet through long-term contracts allows us to mitigate considerably the effects of the negative cycles.

Most of the industry's analysts and players have a very positive outlook on the product tanker market and I totally share their view. On the demand side, the world product seaborne trade is expected to grow by 3% already in 2019 supported by an expected strong underlying oil consumption growth and by forecasted global refinery capacity additions of 4.9 million barrels a day between 2019 and 2021 (according to Clarksons). In particular, 2019 is expected to be characterized by one of the largest annual increases in refinery capacity in years, with an estimated additional 3.1 million barrels a day (according to Clarksons). At the same time, the net fleet growth of the segments we operate in (MRs and LR1s) is expected to be limited and below 2.0% over the next two years. In addition, the major regulatory change that will come into force in January 2020, limiting the sulphur content in bunker fuels, is widely expected to generate incremental demand for our vessels already from mid-2019.

I believe DIS' recent investments and our prudent commercial strategy, together with a very modern, versatile and high-quality fleet and organization, will allow us to benefit in full from the next expected positive shipping cycle. Our investment plan based on 22 newbuilding vessels we began to order in 2012 is now coming to an end, with the last LR1 ship expected to be delivered in Q3 2019.

At the same time, we remain intensely focused in strengthening DIS' financial structure. With this purpose, DIS' Board of Directors approved today a share capital increase amounting to the US\$ equivalent of Euro 44 million, to reduce our financial leverage and improve our liquidity position. Once again, our controlling shareholder, d'Amico International S.A., which has been supporting DIS during this difficult period, through share capital increases, early exercise of its warrants and direct loans, provided its irrevocable and unconditional commitment to fully subscribe the rights offering."

Carlos Balestra di Mottola, Chief Financial Officer of d'Amico International Shipping commented:

"During a very challenging year characterized by a very tough market, we maintained a constant focus on strengthening our balance sheet and improving our liquidity position. In addition to over US\$ 40 million net cash proceeds (after debt repayment) generated in 2017 through outright sales and sale and lease back transactions, we managed to raise an additional US\$ 56.5 million in 2018 through similar deals, of which US\$ 46.9 million arising from sale-leaseback transactions for four vessels and US\$ 9.6 million from the outright sale of two vessels.

In Q1 2019, we closed sale and sale-leaseback deals, which already generated US\$10.2 million in net cash for the Company and that will generate an additional US\$6.2 million in net cash upon the delivery of one vessel to their new owners.

At the same time, we are now almost at the end of our newbuilding plan, with only one LR1 expected to be delivered in Q3 2019 for a total remaining capital expenditure of US\$ 31.6 million (of which approximately US\$ 18.8 million should be financed with committed bank debt and the rest with own funds).

From 2020, the lower investments and debt repayments, when coupled with the expected increase in freight rates, should contribute to a significant generation of free cash-flow for our shareholders, as well as a rapid deleveraging of our balance sheet.

As at December 31, 2018 DIS had 'cash and cash equivalent' of US\$ 31.7 million and a net financial position of US\$ (588.7) million, which represents 72.9% of DIS' fleet market value.

We went through a very challenging period for our industry and we successfully overcame all the financial difficulties that the weak freight markets generated, always respecting our bank covenants and all our stakeholders' interests. I strongly believe we are now at a real turning point for our market and I do think we have a very positive future in front of us. From this perspective, we believe it is now crucial to reduce our financial leverage and achieve a more robust capital structure, to fully benefit from the next positive cycle and create value for our shareholders. With this objective, DIS' Board of Directors approved today a share capital increase amounting to the US\$ equivalent of Euro 44 million, with preferential subscription rights offered to its existing shareholders and the new shares issued at a discount to the theoretical exrights price (TERP) of 15%, based on DIS' reference share price on 19 March. DIS' controlling shareholder, d'Amico International SA, fully guarantees the offering, once again demonstrating its commitment to DIS and strong belief in its prospects."

FINANCIAL REVIEW

SUMMARY OF THE RESULTS IN THE FOURTH QUARTER AND TWELVE MONTHS OF 2018

Market conditions across all product tanker sectors were soft in the first nine months of 2018, largely due to existing oversupply of tonnage coupled with weaker demand trends. Rising bunker prices during the first nine months of 2018 have capped earnings during that period, contributing to more limited product arbitrage opportunities, mainly between the Atlantic and Asia, weighing on products trade growth. In Q4 2018, however, the market firmed considerably with Clarksons' raising its estimate of growth in product tanker dwt demand for the year from 2.1% to 2.3%. Among the factors contributing to weak markets in 2018 is the reduction in products imports into Southeast Asia, which fell by 8% in the full year, partially as a result of reduced arbitrage flows from the West. Declining shipments into Brazil (which fell 18% year-on-year in the January-November 2018 period) and Mexico in the first half of the year also dampened overall volume growth. Mexican imports recovered in the second half of the year and Brazilian imports from the US surged in the last quarter, rising by 54% between September and October 2018.

The one-year time-charter rate is always the best indicator of spot market expectations. As markets failed to show any signs of improvement in Q3 2018, this rate for conventional (non-eco) MRs was between US\$ 12,500 and US\$ 12,750 per day. The improved sentiment in Q4 raised the rate at the end of the year to around US\$ 13,500 per day for conventional (non-Eco) MRs and to around US\$15,000 per day for Eco MRs.

DIS' Net Result was negative for US\$ (55.1) million in full-year 2018 vs. a Net Loss of US\$ (38.1) million posted in 2017. This variance is mainly due to the weaker product tanker market experienced in 2018. In fact, **DIS'** daily spot rate¹ was US\$ 10,798 in the full-year 2018 vs. US\$ 12,026 in the full-year 2017. In detail, the freight market hit historically low rates in the third quarter of the year but rebounded to profitable levels towards the end of 2018. Freight rates at the start of 2019 are showing clear signs of improvement relative to the previous year.

At the same time, 34.2% of DIS' total employment days in 2018, were covered through 'time-charter' contracts at an average daily rate of US\$ 14,850 (2017: 33.0% coverage at an average daily rate of US\$

¹ Daily Average TCE excludes US\$ 5.4 million generated by the vessels under commercial management, as it is off-set by an equivalent amount of time charter hire costs.

15,433). Such good level of time charter coverage is one of the pillars of DIS' commercial strategy and allows it to mitigate the effects of the spot market volatility, securing a certain level of earnings and cash generation even throughout the negative cycles. DIS' total daily average rate (which includes both spot and time-charter contracts) was US\$ 12,184 in the full-year 2018 compared with US\$ 13,150 achieved in the previous year.

In 2018, DIS 'gross capital expenditures' amounted to US\$ 101.5 million (US\$ 1.3 million in Q4 2018), mainly in relation to DIS' newbuilding plan. Since 2012, DIS has ordered a total of 22 'Eco-design' product tankers² (10 MR, 6 Handy-size and 6 LR1 vessels), of which 20 vessels have been already delivered as at the end of 2018. This corresponds to an overall investment plan of approximately US\$ 755.0 million and is in line with the Group's strategy to modernize its fleet through new-buildings with an eco-design. In addition, DIS has fixed the majority of its new-building vessels on long-term time-charter contracts with three oil-majors and a leading trading house, securing a good level of earnings and cash generation.

OPERATING PERFORMANCE

Time charter equivalent earnings were US\$ 244.9 million in 2018 vs. US\$ 257.4 million in 2017. The total amount for 2018 includes US\$ 5.4 million 'time charter equivalent earnings' generated by the vessels under commercial management, which is offset by an equal amount reported under 'Time charter hire costs'.

The variance compared with last year is due to the much weaker product tanker market experienced in 2018. In fact, DIS realized a **Daily Average Spot Rate of US\$ 10,798 in 2018**³ compared with US\$ 12,026 achieved in the previous year. After a very weak product tanker market in October 2018, freight rates rallied in the last part of Q4 2018, allowing DIS to achieve a Daily Average Spot Rate of US\$ 11,617, slightly better than the US\$ 11,299 realized in the same quarter of the prior year.

Following its strategy, in 2018 DIS maintained a **good level of 'coverage'** (fixed contracts), securing an average of **34.2%** (2017: 33.0%) of its available vessel days at a **Daily Average Fixed Rate of US\$ 14,850** (2017: US\$ 15,433). In addition to securing revenue and supporting the operating cash flow generation, these contracts enabled DIS to strengthen its historical relationships with the main oil majors, which is one the pillars of its commercial strategy.

DIS' Total Daily Average TCE (Spot and Time Charter) 4 was US\$ 12,184 in 2018 vs US\$ 13,150 in 2017.

⁴ Daily Average TCE excludes US\$ 5.4 million generated by the vessels under commercial management, as it is off-set by an equivalent amount of time charter hire costs.

EBITDA was **US\$ 17.5** million in **2018** compared with US\$ 36.8 million achieved in 2017. The reduction relative to last year is mainly due to lower 'TCE Earnings' achieved in 2018. **DIS' EBITDA Margin was 7.2%** in **2018** compared with 14.3% in 2017.

Depreciation, impairment and impairment reversal amounted to US\$ (34.8) million in 2018 vs. US\$ (48.3) million in 2017. The total amount for 2017 included an impairment of US\$ (10.9) million booked on three vessels, which were under sale negotiations at the time. In fact, based on IFRS 5 these three ships were classified as 'assets held for sale' and the difference between their appraised market value and their book value was charged to the 2017 profit and loss. However, the sale transaction on two of these vessels has not materialized as at the end of 2018. Therefore, DIS booked an impairment reversal of US\$ 4.9 million on the two ships and their book value was reclassified from 'assets held for sale' to 'fixed assets'.

EBIT was **negative for US\$ (17.3) million in 2018** compared to a negative result of US\$ (11.4) million in 2017.

Net financial income was US\$ 5.0 million in 2018 vs. US\$ 2.4 million in 2017. The 2018 amount comprises amounts from derivative instruments totalling US\$ 2.2 million due to the equity release on the IRS on the M/T High Freedom, M/T High Trust, M/T High Loyalty and M/T High Trader (following the sale and leaseback of the vessels in the period) and US\$ 0.5 million representing realized profit on foreign exchange hedges. Realized amounts include also US\$ 0.34 million foreign exchange gain on commercial transactions, bank interest income (funds held with financial institutions on deposit and current accounts) and interest on the financing provided to the DM Shipping joint venture. Unrealized gains of US\$ 1.9 million relate to the ineffective portion (fair value) of the interest rate swaps cash-flow hedges.

Net financial charges were US\$ (34.3) million in 2018 vs. US\$ (28.4) million in 2017. The amount comprises the interest expenses due on DIS' bank loan facilities and financial leases, actual expenses on interest rate swaps and amortization of financial fees.

Income taxes were US\$ (1.0) million in 2018 vs. US\$ (0.8) million in the previous year.

The *Net Result* for **2018** was **US\$** (**55.1**) million compared with a Net loss of US\$ (38.1) million in 2017. The variance compared to the previous year is mainly due to the much weaker spot market experienced in 2018.

CASH FLOW AND NET INDEBTEDNESS

DIS' **Net Cash Flow for 2018 was positive, amounting to US\$ 2.8 million** vs. US\$ (2.5) million in 2017. During the year, gross capital expenditures of US\$ 101.5 million, were partially offset by US\$ 21.9 million in proceeds from disposal of vessels and US\$ 74.6 million positive financing cash flow.

Cash flow from operating activities was positive, amounting to US\$ 7.6 million in 2018 vs. US\$ (11.3) million in 2017. The better result achieved in the first nine months of 2018 was mainly due to a reduction in working capital.

DIS' Net debt as at December 31, 2018 amounted to **US\$ 588.7 million** compared to US\$ 510.3 million at the end of 2017. The net debt/fleet market value ratio was of 72.9% as at December 31, 2018 vs. 66.6% as at December 31, 2017.

Ltd. (Japan), for a consideration of US\$ 14.14 million. This transaction generated at delivery of the Vessel in Q1 2018, a positive net cash effect of around US\$ 7.2 million for d'Amico Tankers, net of commissions and reimbursement of the vessel's existing loan, contributing to the liquidity required to complete DIS' fleet renewal program. This transaction allowed d'Amico Tankers to generate around US\$ 13.4 million in cash in Q1 2018, net of commissions and reimbursement of the vessel's existing loan, contributing to the liquidity required to complete DIS' fleet renewal program. In addition, through this transaction d'Amico Tankers will maintain full control of the Vessel, since a 10-year bareboat charter agreement was also concluded with the buyer, with a purchase obligation at the end of the charter period. This transaction allows d'Amico Tankers to generate at the vessel's delivery around US\$ 11.9 million in cash, net of commissions and the reimbursement

of the vessel's existing loan. In addition, through this transaction d'Amico Tankers will maintain full control of the vessel, since a 10-year bareboat charter agreement was also concluded with the buyer, with a purchase obligation at the end of the 10th year of the charter period. Furthermore, d'Amico Tankers has the option to repurchase the vessel, starting from the second anniversary of her sale at a competitive cost of funds.

In addition, through this transaction d'Amico Tankers will maintain full control of the vessel, since a 10-year bareboat charter agreement was also concluded with the buyer, with a purchase obligation at the end of the 10th year of the charter period. Furthermore, d'Amico Tankers has the option to repurchase the vessel, starting from the second anniversary of her sale at a competitive cost of funds.

In November 2018, DIS announced that its subsidiary d'Amico Tankers d.a.c. signed a memorandum of agreement and bareboat charter contract for the sale and leaseback of the M/T High Trader, a 49,990 dwt medium-range product tanker vessel, built in 2015 by Hyundai-Mipo, South Korea for a consideration of US\$ 27.0 million. This transaction allows d'Amico Tankers to generate at the vessel's delivery around US\$ 8.6 million in cash, net of commissions and the reimbursement of the vessel's existing loan. In addition, through this transaction d'Amico Tankers will maintain full control of the vessel, since a 10-year bareboat charter agreement was also concluded with the buyer, with a purchase obligation at the end of the 10th year of the charter period. Furthermore, d'Amico Tankers has the option to repurchase the vessel, at any time starting from the second anniversary of her sale with three months' notice at a competitive cost of funds.

- Shareholders' Extraordinary General Meeting: On February 8, 2019, d'Amico International Shipping S.A. convened the extraordinary general meeting of shareholders of the Company to be held on 11 March 2019 ("EGM"). The board of directors of the Company (the "Board of Directors") proposed to the EGM to increase the authorised corporate capital by 750,000,000 shares to 1,750,000,000 shares with the intention, subject to the approval of the EGM and to market conditions, to execute in the weeks following the EGM a Capital Increase respecting the following conditions:

- Shareholders' Extraordinary General Meeting: On March 11, 2019, the Extraordinary General Meeting of DIS resolved:
- I) to approve the proposed reduction of the accounting value of each share of the issued share capital of the Company from its former amount of USD 0.10 per share to now USD 0.05 per share without cancellation of any shares in issue nor repayment on any share nor off-setting of any losses as proposed by the Board of Directors in the explanatory report published on 8 February 2019 and available to Shareholders in the Corporate Governance section of the Company's website (www.damicointernationalshipping.com);

D'AMICO TANKERS D.A.C.:

- Newbuilding vessels: In January 2019, M/T Cielo di Houston, an 'Eco' new-building LR1 product tanker built by Hyundai Mipo Dockyard Co. Ltd. (South Korea) at their Hyundai Vinashin Shipyard Co. Ltd. in Vietnam, was delivered to the Group.
- First Japanese Operating Lease Transacion: In January 2019, DIS announced that its subsidiary d'Amico Tankers d.a.c. signed a memorandum of agreement and bareboat charter contract for the sale and leaseback of the M/T Cielo di Houston, a 75,000 dwt LR1 product tanker vessel built by Hyundai-Mipo, South Korea (at their Vinashin facility in Vietnam) and delivered in January 2019. The vessel was sold for a consideration of US\$ 38.6 million. This transaction allowed d'Amico Tankers to generate around US\$ 10.2 million in cash, net of commissions and additional costs, relative to financing the vessel though the previously committed loan facility. In addition, through this transaction d'Amico Tankers maintained full control of the Vessel, since a 10.2-year bareboat charter agreement was also concluded with the buyer. Furthermore, d'Amico Tankers has the option to repurchase the vessel, after approximately 5 years and after approximately 7 years of the charter period, at a competitive cost of funds.
- 'Time Charter-In' and 'Commercial management' Fleet: In January 2019, the time-charter-in contract on M/T Freja Hafnia, an MR vessel built in 2006, expired and d'Amico is now acting as commercial manager of the vessel, earning a 2% commission on her gross revenues. In the same month, the management contract on M/T High Beam ended and the Vessel was redelivered to her owners.

Between February and March 2019, the management contracts on M/T High Current, M/T High Force and M/T High Glow ended and these vessels were redelivered to their owners.

• Vessel Sale: In February 2019, DIS announced that DM Shipping d.a.c., a joint venture with the Mitsubishi Group, in which d'Amico Tankers d.a.c. holds a 51% participation, signed a memorandum of agreement for the sale of the M/T High Strength, a 46,800 dwt MR product tanker vessel, built in 2009 by Nakai Zosen Corporation, Japan for a consideration of US\$ 16.4 million. The Vessel will continue its current time-charter out contract with d'Amico Tankers d.a.c. until October 2019. This transaction allows DM Shipping to generate around US\$ 12.3 million in cash, net of commissions and reimbursement of the Vessel's existing loan.

BUSINESS OUTLOOK

According to the IMF in their latest World Economic Outlook ("WEO") of January 2019, the global expansion has weakened, driven by a slowdown in particular in some countries in Europe and Asia. Despite this, healthy global growth of 3.7% is estimated for 2018, in-line with their previous forecast of October 2018. The global economy is projected to grow at 3.5% in 2019 and 3.6% in 2020, 0.2 and 0.1 percentage points below last October's projections. The global growth forecast for 2019 and 2020 had already been revised downward in the last WEO, partly because of the negative effects of tariff increases enacted in the United States and China earlier that year. The further downward revision since October partly reflects carry over from softer momentum in the second half of 2018 – including in Germany following the introduction of new automobile fuel emission standards and in Italy where concerns about sovereign and financial risks have weighed on domestic demand – but also weakening financial market sentiment.

The International Energy Agency's (IEA) latest estimate for crude oil demand growth in 2018 is unchanged. Growth in Q4 2018 is estimated to have been robust, at 1.4 million b/d year-on-year, and for 2018 as a whole growth was estimated at 1.3 million b/d; China (0.44 million b/d), India (0.21 million b/d) and the US (0.54 million b/d) contributed 1.19 million b/d of the total. Growth in demand in 2019 is expected to be 1.4 million b/d, also unchanged from their last report. It is supported by lower prices and the start-up of petrochemical projects in China and the US. Slowing economic growth will, however, limit any upside.

⁵ In August 2018, the time-charter-in contracts on M/T High Beam, M/T High Current, M/T High Glow, M/T High Enterprise, M/T High Force, all expiring between August 2018 and October 2018, were extended for 1 to 3 more spot voyages. The original fixed hire rate was changed into a 'floating hire rate' based on the spot market earnings of each of the vessels. Therefore, d'Amico is effectively acting as commercial manager of these vessels, earning a 2% commission on all their gross revenues.

Q1 2019 rate levels have corrected since the uptick in Q4 2018. Mainly as a result of reduced imports into West Africa and reduced exports from the United States. Month-on-month exports from the US have declined 1 million b/d by mid-February. A number of newbuilding VLCCs and Suezmaxes have been fixed for distillates from Asia to the Western hemisphere hampering arbitrage opportunities for product tankers. According to Clarksons, in the product tanker sector, dwt demand growth is projected to improve to 3.0 / 3.5% in 2019, supported by the return of some Asian arbitrage opportunities and possible inventory building.

ALTERNATIVE PERFORMANCE MEASURES (APM)

Along with the most directly comparable IFRS measures, DIS management is regularly using Alternative Performance Measures, as they provide helpful additional information for users of its financial statements, indicating how the business has performed over the period, filling the gaps left by the reporting standards. APMs are financial and non-financial measures of historical or future financial performance, financial position or cash-flows, other than a financial measure defined or specified in the Group's applicable financial reporting framework and standards (IFRS); for this reason they might not be comparable to similarly titled measures used by other companies and are not measurements under IFRS or GAAP and thus should not be considered substitutes for the information contained in the Group's financial statements. The following section sets out the Group's definitions of used APMs:

FINANCIAL APMs (They are based on or derived from figures of the financial statements)

Time charter equivalent earnings

A shipping industry standard allowing the comparison of period-to-period net freight revenues, which are not influenced by whether the vessels were employed on Spot charters, Voyage charters or Contracts of affreightment (please see Non-Financial APM definitions below). As indicated in the Profit and Loss financial statement, it is equal to (voyage) revenues less voyage costs.

EBITDA and EBITDA Margin

EBITDA is defined as the result for the period before the impact of taxes, interest, the Group's share of the result of joint ventures and associates, depreciation and amortization. It is equivalent to the gross operating profit, which indicates the Group's revenues from sales less its cost of the services (transport) sold. EBITDA Margin is defined as EBITDA divided by Time charter equivalent earnings (as described above). DIS believes that EBITDA and EBITDA Margin are useful additional indicators investors can use to evaluate the Group's operating performance.

EBIT and EBIT Margin

EBIT is defined as the result for the period before the impact of tax, interest and the Group's share of the result of joint ventures and associates. It is equivalent to the net operating profit and the Group uses it to monitor its return after operating expenses and the cost of the use of its tangible assets. EBIT Margins is defined as operating profit as a percentage of Time charter equivalent earnings and represents for DIS a suitable measure to show the contribution of the Time-Charter Earnings in covering both fixed and variable costs.

Gross CAPEX

Gross capital expenditure, that is the expenditure for the acquisition of fixed assets as well as expenditures capitalised as a result of the intermediate or special surveys of our vessels, or of investments for the improvement of DIS vessels, as indicated under Net acquisition of fixed assets within the cash-flow from investing activities; it gives an indication about the strategic planning (expansion) of the Group (capital intensive industry).

Net Indebtedness

Comprises bank loans and other financial liabilities, less cash and cash equivalents and liquid financial assets or short-term investments available to service those debt items. The Group believes net indebtedness is relevant to investors as it is a metric on the overall debt situation of a company, indicating the absolute level of non-equity funding of the business. The relevant table in the net indebtedness section within the report on operations, reconciles net debt to the pertinent balance sheet line items.

NON-FINANCIAL APMs (not derived from figures of the financial statements)

Available vessel days

Total theoretical number of days a vessel is available for sailing during a period. It provides an indication of the Group's fleet earnings potential during a period, which takes into account the date of delivery to and redelivery from the Group of the vessels in its fleet (please refer also to the Key figures, other operating measures).

Coverage

Ratio indicating how many available vessel days are already covered by fixed rate contracts (time charter contracts or contracts of affreightment). It provides an indication of how exposed the Group is to changes in the freight market during a certain period (please refer to Time charter equivalent earnings in the Management financial review).

Daily spot rate or daily TC rate

Daily spot rate refers to daily time-charter equivalent earnings (please refer to definition below) generated by employing DIS' vessels on the spot market (or on a voyage basis) and daily TC rate refers to daily time-charter earnings generated by employing DIS' vessels on 'time-charter' contracts (please refer to the Management financial review).

Off-hire

Means the period in which a vessel is unable to perform the services for which it is immediately required under a time charter. Off-hire periods can include days spent on repairs, dry-docking and surveys, whether or not scheduled. It can help to explain changes in time-charter equivalent earnings between different periods (please refer to Revenues, in the Management financial review).

Time charter equivalent earnings per day

A measure of the average daily revenue performance of a vessel on a per voyage basis. DIS' method of calculating time charter equivalent earnings per day is consistent with industry standards and is determined by dividing voyage revenues (net of voyage expenses) by on-hire days for the relevant time period. Time charter equivalent earnings per day is a standard shipping industry performance measure used primarily to compare period-to-period changes in a shipping company's performance, since it is unaffected by the changes in the mix of charter contracts (i.e. spot charters, time charters and contracts of affreightment) through which the vessels are employed. It allows a comparison of the Group's performance with industry peers and market benchmarks (please refer to Key figures).

Vessels equivalent

The number of vessels equivalent in a period is equal to the sum of the products of the total available vessel days over that period for each vessel and the participation of the Group (direct or indirect) in that vessel, divided by the number of calendar days in that period. It provides an indication of the Group's fleet size and earnings potential over a period (please refer to Key figures).

OTHER DEFINITIONS

Bareboat charter

A contract type under which the ship owner is usually paid monthly in advance charter hire at an agreed daily rate for a specified period of time, during which the charterer is responsible for the technical management of the vessel, including crewing, and therefore also for its operating expenses (please refer to note 6). A bareboat charter is also known as a "demise charter" or a "time charter by demise".

Charter

A contract for the hire of a vessel for a specified period of time or to carry cargo from a loading port to a discharging port. The contract for a charter is commonly called a charter party and there are three main

types of such contracts, a bareboat charter party, a voyage charter party and time charter party (refer to definitions in this section).

Contract of affreightment (COA)

An agreement between an owner and a charterer which obliges the owner to provide a vessel to the charterer to move specific quantities of cargo, at a fixed rate, over a stated time period but without designating specific vessels or voyage schedules, thereby providing the owner with greater operating flexibility than with voyage charters alone.

Disponent Owner

The company that operates a vessel controlling it either through a time-charter or a bareboat charter.

Fixed-rate contracts

For DIS these usually refer to revenues generated through time-charter contracts or contracts of affreightment (please refer to definitions in this section). Bareboat charter contracts are also usually fixed rate contracts but DIS controls rather than employs vessels through such contracts.

Spot charter or Voyage charter

A contract type through which an owner or disponent owner (please refer to definition in this section) is paid freight on the basis of moving cargo from a loading port to a discharging port. The charterer pays the vessel owner on a per-ton or lump-sum basis. The payment for the use of the vessel is known as freight. The disponent owner is responsible for paying both vessel operating expenses and voyage expenses. Typically, the charterer is responsible for any delay at the loading or discharging ports.

Time charter

Is a contract type through which the ship owner or disponent owner (please refer to definition within this section) is paid usually monthly in advance charter hire at an agreed daily rate for a specified period of time (usually a fixed rate contract). With such contracts the charterer is responsible for paying the voyage expenses and additional voyage insurance. A ship-owner or bareboat charterer operating its vessel on time-charter is responsible for the technical management of the vessel, including crewing, and therefore also for its operating expenses.
